2026

**Cork
Chamber**
Advancing business together

Partners

Welcome

The Cork Chamber Partner Programme continues to stand as a powerful catalyst for progress within Cork Chamber's business community. Each year, the programme strengthens its role as a forum for strategic leadership, uniting industry experts who provide invaluable insights and shape the region's priorities at both local and national levels.

As 2026 unfolds, Cork's business landscape remains defined by ambition and a collective drive for innovation. Global economic shifts, accelerating technological change and rising sustainability expectations continue to influence how businesses operate. Yet, throughout these changes, Cork maintains its position as a vibrant regional economy supported by a robust indigenous sector and a strong multinational presence.

National policy decisions in the years ahead will be instrumental in determining the level of investment directed toward housing, transport, digital capability, skills and energy infrastructure. These choices will shape Cork's ability to grow and compete. Ensuring that Cork's needs are represented in this national conversation is essential, and the thoughtful engagement of our Chamber Partners play a central role in achieving this.

Through the Thought Leaders Council, Partners contribute expertise that strengthens our advocacy agenda and helps deliver tangible outcomes for the region.

Cork Chamber remains committed to fostering a sustainable and globally connected business environment, one that nurtures innovation, attracts investment and supports long-term economic opportunity for all. As work continues on delivering the ambitions outlined in our Strategic Plan 2025–2028, the partnership and leadership of our members provide the foundation for meaningful progress.

Together, the business community continues to champion a bold vision: a thriving, competitive and inclusive Cork city and county where enterprise can flourish and people can prosper.

Delivering life-changing medicines for people affected by rare diseases

ALEXION, ASTRAZENICA RARE DISEASE

Turning pioneering science into transformative treatments, we partner with rare disease communities across the globe to improve outcomes for people impacted by rare diseases. Today we have 7 approved medicines across 8 rare diseases in more than 70 countries. Combining our rare disease expertise with AstraZeneca's global footprint, by 2030 we aim to deliver 5 new medicines, advance new modalities such as cell and gene therapy, and expand our reach to 100 countries. We are shaping rare disease ecosystems through global partnerships, accelerating diagnoses and creating new pathways to rare disease care. Together, we aim to revolutionise rare disease treatment, rewriting future narratives for patients worldwide.

Amarenco – A Global Renewables Player founded and headquartered in Cork

AMARENCO

Amarenco is an international developer, investor, and owner of solar PV and energy-storage projects. With its headquarters in Cork and founded in 2013, the company has secured more than €1 billion in funding to build and operate renewable assets across 14 countries. Today, Amarenco employs 220 people and manages 620 MW of operational capacity, including 42 MW delivered across five solar farms in County Cork.

In 2024, the company delivered France's largest energy-storage installation at 105 MW. With a European development pipeline exceeding 3,500 MW, Amarenco is on track to reach 1,000 MW of operational capacity by 2026.

www.amarencogroup.com/en/

Apple has over 6,000 employees in Ireland

APPLE

Apple recently marked 45 years in Cork. From a single manufacturing site with 60 employees the company has grown to over 6,000 employees in Ireland, the majority based at its Hollyhill campus. These teams play a vital role in serving the needs of Apple's customers.

Cork is home to a manufacturing hub along with teams focused on logistics, operations, AppleCare and finance. In 2022 we opened an engineering and test facility which analyses the entire range of Apple products to ensure they are best in class for durability and performance.

Apple continues to invest and develop its capabilities at Hollyhill, benefitting its customers around the world.

BIOMARIN INTERNATIONAL LTD.

Leadership Team
at BioMarin

Founded in 1997, BioMarin is a global biotechnology company dedicated to transforming lives through genetic discovery. The company develops and commercialises targeted therapies that address the root cause of the genetic conditions that it seeks to treat, helping to create a better future for those living with rare genetic disease. In 2024, an investment of €60 million was announced with the expansion of its state-of-the-art facility in Shanbally, Co. Cork, including the addition of a new, four-storey laboratory facility that will enable increased production capacity for currently approved medicines and create room for future growth. This work is ongoing and due to be completed by early 2027. Employing more than 600 people, the expansion adds to BioMarin's footprint in Ireland where the company operates the manufacturing site in Shanbally and a commercial office in Dublin.

*David Kelly,
Chief Executive Officer,
Gas Networks Ireland*

GAS NETWORKS IRELAND

Headquartered in Cork, Gas Networks Ireland operates and maintains Ireland's €3bn, 14,758km national gas network, which is considered one of the safest and most modern renewables-ready gas networks in Europe. Over 720,000 Irish homes and businesses, including over 87,000 in Cork, trust Ireland's gas network to provide efficient and reliable energy to meet their heating, cooking, manufacturing and transport needs. The cornerstone of Ireland's energy system, it securely supplies more than 30% of Ireland's total energy and almost 50% of the country's electricity generation. Gas Networks Ireland is aiming to deliver a repurposed and fully decarbonised gas network by 2045. Its "Pathway to a Net Zero Carbon Network" envisions transforming the existing gas network into two separate systems carrying 100% renewable gas, one dedicated to biomethane and the other to green hydrogen, with the potential to carry approximately 30% biomethane and 70% green hydrogen, as well as offering significant energy export opportunities.
